Mikron Node Reward Program - Requirements

You have the chance to receive mikrons for running a node and contributing to the upkeep of the Mikron network. If you decide to run a node, you must meet certain requirements listed below to receive your daily reward. If you meet the requirements and you set up your software wallet properly, you will receive mikrons automatically, each morning. For setting up your wallet, please see this documents.

Mikron Node Reward Program packages:

level 1: 25 mikrons reward/day - minimum amount req. in the wallet: 1.000 mikrons
level 2: 400 mikrons reward/day - minimum amount req. in the wallet: 25.000 mikrons.
level 3: 5000 mikrons reward/day - minimum amount req. in the wallet: 1.000.000 mikrons

Requirements:

- The node (it's part of the software wallet) must run with a publicly visible IP address.

- During a 24 hour period, the node must be up and running 90% of the time. We check it using a 5 minute sampling method.

- Have a valid Mikron address and have at least 1000 mikrons on the balance.

- If you need mikrons, you can receive some at one of our partners or buy some on mikron.io

- One wallet address can only be associated with one node. If you want to run more nodes, you must run different wallets, with the minimum amount of 1000 mikrons on each one of them.

- If you run more nodes from the same IP address (and with different ports), only one address can receive the reward.

- If there happens to be more than 200 nodes running at the same period on level 1, the total amount of rewards given out are proportionally decreasing based on the following formula: $5000 / N$ daily, where N is the number of nodes currently running.

- If there happens to be more than 20 nodes running at the same period on level 2, the total amount of rewards given out are proportionally decreasing based on the following formula: $7500 / N$ daily, where N is the number of nodes currently running
.
- If there happens to be more than 20 nodes running at the same period on level 3, the total amount of rewards given out are proportionally decreasing based on the following formula: $23000 / N$ daily, where N is the number of nodes currently running.

FAQ

What do I need to do to actually run a node?

If you meet the requirements listed above, please see this guide for setting up your wallet and start receiving rewards.

What hardware do I need for staking Mikron?

All you need is an average PC with an average internet connection, a Mikron wallet, a Mikron account and a certain amount of mikrons (min.: 1000) There is no need for any graphics cards, rigs, ASIC mining machines and it's really energy-efficient.

Can Mikron be mined?

No, Mikron is not a mineable cryptocurrency but you can still make some money with it. Mikron uses delegated Proof-of-Stake consensus model, meaning by running the wallet (which also acts as a node) you can receive Mikron rewards for maintaining the network.

When do you start?

The Mikron Node Reward Program is up and running from 10th of January 2019

Can the rules and requirements change?

Yes, the Mikron team reserves the right to change any and all the rules of the Program in order to protect the ecosystem. The Mikron team also reserves the right to cancel the Node Reward Program entirely.
